WHO WE ARE

Invest in yourself and advance your career.

Level Up in Tech is a comprehensive cloud career bootcamp for individuals who are serious about taking their first steps in the cloud industry. We prepare you with a strategic learning path that focuses on real-world experience that you can show employers. Throughout the process, we offer career coaching to polish up your resume and ensure you're ready for the interview that could lead to your dream job.

"Be excited! You're choosing to put yourself first and grow personally and professionally. Learning new skills will only open new doors for you so enjoy the process and soak everything in. Trust me it's a fun, exhilarating experience."

Broadus Palmer
CEO and Founder

WHY WE STARTED

Your transferable skills are needed.

You already have certain essential skills required to succeed in the dynamic world of tech and the cloud. Now more than ever, companies are looking for a strong set of transferable skills in their candidates

The increasing demand for cloud practitioners and the shortage of these professionals present a golden opportunity for many to learn the required skills and stay ahead of the game.

THE PROGRAM

We will set you up for success.

The AWS DevOps program will teach you the necessary skills to get a role in the cloud using our 6 step process. Our project-based program gives you the opportunity to not only obtain new skills but also practice these skills through projects.

At the end of the program, you will be certified and trained in many areas of cloud technology. Some of these areas are Infrastructure as Code, Programming, and AWS.
